

EXAMPLE SOLAR PV PROJECT PROPOSAL

Generic 40kW Example

Submitted To: Juhl Customer
Project Reference: Generic 40kW Example
Site Address: TBD
City, State, Zip: TBD, MN TBD

PROPOSAL #: MN151000

YOUR SOLAR SYSTEM

SYSTEM SIZE: 39.36 kW
ANNUAL PRODUCTION: 54,445 kWh

Scope of Project: Furnish and Install: 39.36 kW PV Solar Array
Including: Complete Solar PV System and Components, PV Modules, Racking, Inverters, Installation

ROI NUMBERS

\$6,806

1st Year Utility Savings

4.70

Number of Years to Payback

Not Calculated

% reduction in Power Bill

TOTAL SYSTEM COSTS & PROFITS

\$157,440

Total Cost

\$412,737

Incentives & Savings Total

\$255,297

Total Profit at Year 25

YOUR INCENTIVES & SAVINGS

\$102,336

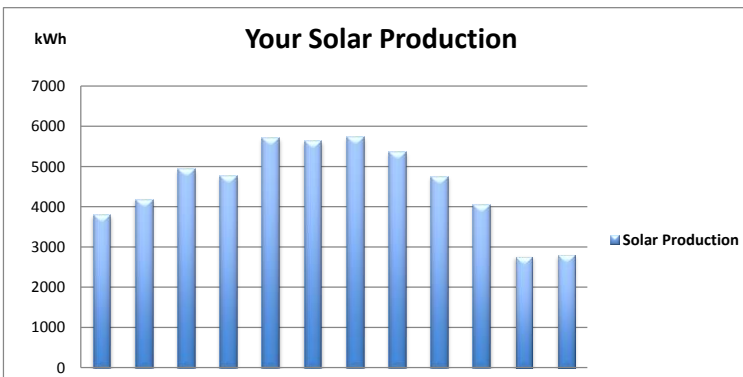

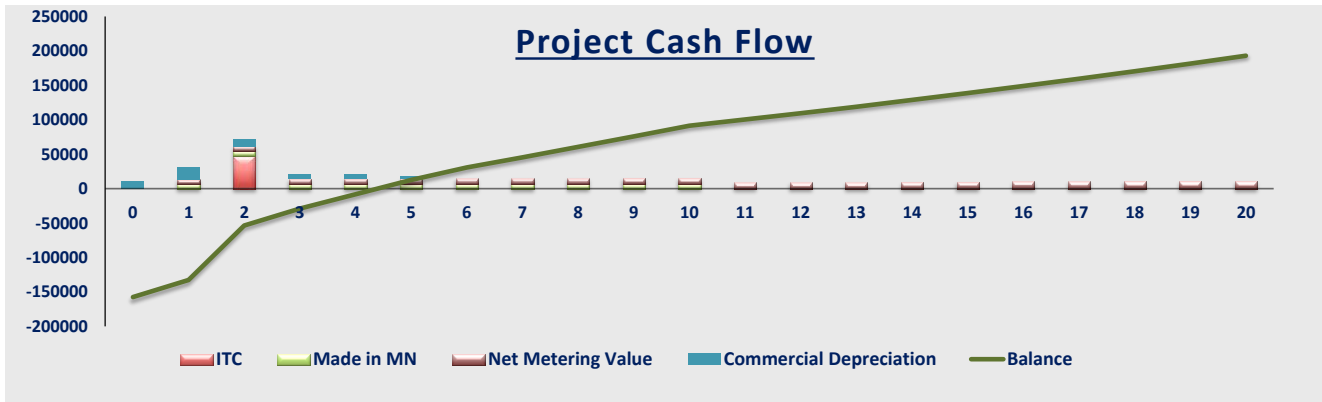

Federal Tax Credit & Depreciation

\$69,207

Made in Minnesota Incentive

\$241,194

25 Year Electricity Savings

Project Steps, Payment Schedule & Estimated Timeline
 TBD

Please include your name, address and utility company

Information and estimates shown are based on average climate reports for the region in which the system will be installed. Actual production and system performance may vary based on weather and/or shading of the solar array. Installation costs are estimates based on local averages, individual project installation costs may vary depending on specific site and/or installation requirements, including but not limited to, conduit run length, trenching distance, install area accessibility, local codes, regulations, and ordinances, or other factors. Pricing is valid for 30 days. A site visit is suggested to determine a specific installation cost for each individual project.
